DETAILED ACTION

Receipt is acknowledged of the amendment filed 05/12/2006.

The rejection under 35 USC 102(b) is hereby withdrawn in view of applicant's amendment of the claims.

The following is a new set of rejections based on applicant's amendment of the claims:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2, 8 and 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 improperly depends upon claim 1 in that it fails to set out the amounts of entactin/nidogen as set out in amended claim 1. Appropriate correction is requested.

Claims 8 and 16 set out that the composition of claim 1 and 12 "comprise" vitronectin. It is indefinite as to whether this is meant to be added to the already existing composition set out in these claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 2, 4-6, 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneider et al (Journal of Vascular Surgery).

Schneider et al disclose vascular grafts on which a coating of heparin sulfate, laminin and collagen may be added (see abstract). This collagen is collagen type II and IV (see page 649, column 1, line 3). The composition may also contain nidogen (page 649, column 1, line 6) and bovine fibroblast growth factor (page 649, column 1, line 1). Nidogen and entactin are the same protein. Further, the reference specifically recited coating of the vascular grafts with extracellular matrix. Along with the components cited above, vitronectin and fibronectin are components of the extracellular matrix. Schneider further washes the extracellular matrix with a solution containing penicillin and streptomycin, adding antibiotics to the coating (see Materials and Methods, page 650). While the referehnce does not set out the percentages of each component, it is clear that all claimed components of the coating are present. As such, it would have been well within the skill of the ordinary practitioner to claim the instant intraluminal device by

modifying the weight percentages of each through routine experimentation, and further, expect similar therapeutic results form the use of such a coating on an intraluminal device as set out by Schneider et al. Given that extracellular matrix already has these components present, applicant would need to show that the amounts set out in the claims would not be present in extracellular matrix, or that they are so unexpectedly different that they would teach away from the reference. As such, it is deemed that the instant claims would have been obvious to one of ordinary skill in the art at the time of invention given the teachings of Schneider et al.

Claim 7 is objected to as dependent upon a rejected base claim.

The Chapter on Cell Adhesion Proteins is cited as evidence of the composition of extracellular matrix. Pages 5-9 are particularly relevant.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos A. Azpuru whose telephone number is (571) 272-0588. The examiner can normally be reached on Tu-Fri, 6:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on (571) 272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
